

Falls Lake Project
Drought Update— 06 February 2003

As of the date of this report, the reservoir level is 252.7 feet, msl, which is 1.2 feet above guide curve.

Recent rainfall events brought the lake elevation up above guide curve. At present, discharges are about 2060 cfs. It is anticipated that these flows will be decreased soon as the lake level is nearing guide curve.

If the lake levels fall below guide curve, then this report will be updated on a regular basis.
